

How Does ONE Missing Assignment Affect Your Grade?

| | Points | = | Grade |
|---|--------|---|----------------|
| Assignment 1 | 90 | = | A |
| Assignment 2 | 92 | = | A |
| Assignment 3 | 95 | = | A |
| Assignment 4 | 100 | = | A |
| Assignment 5 | 80 | = | B |
| Assignment 6 | 95 | = | A |
| <div style="display: flex; justify-content: space-between; align-items: center;"> TOTAL 552 = A average </div> | | | |
| Assignment 7 | 0 | = | MISSING |
| <div style="display: flex; justify-content: space-between; align-items: center;"> TOTAL 552 = C average </div> | | | |
| Assignment 8 | 90 | = | A |
| Assignment 9 | 95 | = | A |
| Assignment 10 | 90 | = | A |
| <div style="display: flex; justify-content: space-between; align-items: center;"> TOTAL 827 = B </div> <div style="text-align: right; margin-top: 5px;"> Low B average </div> | | | |

$552/6 = 92$
 $92 = A$

$552/7 = 78$
 $78 = C$

$827/10 = 82$
 $82 = B$

This student had 10 assignments.
 8 were "A" 1 was "B"

One *missing assignment* was a ZERO.

THE FINAL GRADE WILL BE A LOW "B".

**And all
 because of
 one missing assignment!**

What is the moral of this story?
